Projects:

CareerBridge

- Built a full-stack CareerBridge platform using React.js, Node.js, Express.js, and MongoDB
 - Implemented OTP-based email verification and secure authentication system
 - Engineered role-based dashboards for users and recruiters with protected routes
 - Designed job listing and application management features
 - Developed responsive UI with modern design principles
- Live Demo: yourcareerbridge.netlify.app

SwapHub – Product Swap Platform

- Built a full-stack product swapping platform using React.js, Node.js, Express.js, MongoDB and Tailwind CSS.
 - Implemented JWT authentication, bcrypt password hashing and protected routes.
 - Developed complete product management (CRUD), user profile management and Cloudinary image uploads.
 - Designed a complete swap request workflow including Pending, Accept and Reject features with notification APIs.
 - Integrated backend APIs using Axios and built a responsive dashboard with Framer Motion animations.
- Live Demo: swaphub45.netlify.app

School Management System

- Created a School Management System using the MERN Stack (MongoDB, Express.js, React.js, Node.js).
 - Implemented complete CRUD operations for student records management.
 - Built and integrated RESTful APIs for seamless frontend-backend communication.
 - Designed a responsive user interface using React.js and managed API requests with Axios.
 - Utilized MongoDB and Mongoose for efficient database operations.
- Live Demo: school-management-system111.netlify.app
